

NEOCORTEX

Software with an IQ™

Neocortex is a powerful, state-of-the-art AI/sensor/motion-control software platform, that allows machines to mimic manual activity on supply chains. It is the “brain” of the system. The software is application and equipment agnostic. With 15 years of product development, Neocortex is an extremely broad platform with deep application capabilities. It has executed over 350 Million cycles in the field, moving practically anything that flows through a supply chain. Neocortex is more than sensor software or robot control tools. It is a closed loop, reactive control, cybernetic system with well-developed uncertainty awareness.

- ✓ Full suite of AI techniques
- ✓ Algorithms are finely tuned for supply chain applications
- ✓ Longest running software of its kind in the world – V.5.1
- ✓ Multiple techniques for automatic error recovery
- ✓ Seamlessly integrates into existing supply chain processes
- ✓ Fast collision detection and obstacle avoidance
- ✓ Security protocols up-to-date with the state-of-the-art

Beyond simple tools, Neocortex is a powerful software engine incorporating the full mastery, experience and talent of our seasoned team of experts in every application we integrate.
